Stanford, California, U.S.A.
1956-1960

IMPORTANT NOTICES

NO INDEX TO VOLUME 7 WILL BE ISSUED.

Pages 62a and 62b of Number 4 were inserted at the last moment before Number 4 was bound and distributed. Page 62a bears a brief obituary of Margaret Hamilton Storey. In a few copies, page 62b is blank; in others it bears a list of errata occurring in Number 4. A few copies of pages 62a and 62b which bear the list of errata are available to those whose copies lack it. Please apply directly to the Editor.

The Editors hereby affirm that copies of each of the four numbers of Volume 7 were mailed, on or before the imprinted date of publication, to the principal zoological, ichthyological, or natural history museum libraries of Ann Arbor, Berkeley, Cambridge, Chicago, Honolulu, Miami, New Haven, New York, Philadelphia, San Francisco, Seattle, Washington, Berlin, Calcutta, Cape Town, Copenhagen, La Plata, Leningrad, London, Paris, Rio de Janeiro, and Sydney, and to the editors of "Science" and "Nature." On the same day copies were placed on public sale at the Division of Systematic Biology, Stanford. The remainder of the copies distributed by the Division were mailed upon or within a few days of the publication date. Copies distributed through Stanford University Library were frequently delayed for a short time.

The Bulletin is issued irregularly, as publication funds come to hand. Because of this, and because of the lack of staff to handle them, we are unable to accept regular subscriptions. The Bulletin is offered in exchange for serials or other publications bearing upon ichthyology. A price list of back numbers is available, but many issues are now out-of-print and unavailable. In regard to purchase or exchange, please address the Director, Division of Systematic Biology, Stanford University, Stanford, California (94305), U.S.A.

Volume 7 was edited by G. S. Myers and the late Margaret H. Storey.

CONTENTS OF VOLUME 7

BRADBURY, M. G., and D. M. COHEN — An illustration and a new record of the North Pacific bathypelagic fish Macropinna microstoma 57

COHEN, D. M. — The synonymy and distribution of Leuroglossus stilbius Gilbert, a North Pacific bathypelagic fish 19

——— Bathylychnops exilis, a new genus and species of argentinoid fish from the North Pacific 47

——— Nansenia candida, a new species of argentinid fish from the North Pacific, with notes on other species of Nansenia 52

DAHL, G. — Two new annual cyprinodont fishes from northern Colombia 42

DEWITT, H. H. — A contribution to the ichthyology of Nepal 63

———, and J. C. TYLER — Fishes of the Stanford Antarctic Biological Research Program, 1958-1959 162

MYERS, G. S. — Copella, a new genus of pyrrhulinin characid fishes from the Amazon 12

——— Esomus rehi, an Indo-Malayan cyprinid fish 13

——— A note on an Abyssinian catfish, Clarias depressus Myers 14

——— Trends in the evolution of teleostean fishes 27

——— Nomenclator of certain terms used for higher categories of fishes 31

——— Margaret Hamilton Storey (1900-1960) 62a

——— A new zeomorph fish of the family Oreosomatidae from the coast of California, with notes on the family 89

——— The mormyrid genera Hippopotamyrus and Cyphomyrus . . 123

——— The genera and ecological geography of the South American banjo catfishes, family Aspredinidae 132

——— The South American characid genera Exodon, Gnathoplax, and Roeboexodon, with notes on the ecology and taxonomy of characid fishes 206

——— Preface to any future classification on the cyprinid fishes of the genus Barbus 212

——— A forgotten account of a fresh-water belonid fish from northern India 245

——— The names of the South American catfish genera Conorhynchos and Diplomystes 246

———, and J. BOEHLKE — The Xenurobryconini, a group of minute South American characid fishes with teeth outside the mouth 6

(Continued overleaf)

CONTENTS OF VOLUME 7

(Continued from page iii)

MYERS, G. S., and S. H. WEITZMAN — Two new Brazilian fresh-water fishes 1
——— Two new fishes collected by General Thomas D. White in Eastern Colombia 98
——— A Brazilian pike-characid, Boulengerella lateristriga, rediscovered in the Rio Negro 201

TYLER, J. C. — Note on the flatfishes of the genus Poecilopsetta occurring in Atlantic waters 126
——— Erythrocyte counts and hemoglobin determinations for two Antarctic notothenid fishes 199

WEITZMAN, S. H. — A description, supplementary notes and a figure of Corydoras cochui Myers and Weitzman, a Brazilian catfish 14
——— Pyrrhulina spilota, a new species of characid fish from South America 109
——— The systematic position of Piton's presumed characid fishes from the Eocene of Central France 114
——— Figures and descriptions of four South American catfishes of the genus Corydoras, including two new species . . . 140
——— Figures and description of a South American catfish, Corydoras reticulatus Fraser-Brunner 155
——— Further notes on characid fossils 215
——— Further notes on the relationships and classification of the South American characid fishes of the subfamily Gasteropelecinae 217
——— The phylogenetic relationships of Triportheus, a genus of South American characid fishes 239

WILIMOVSKY, N. J. — A new name, Lumpenus sagitta, to replace Lumpenus gracilis (Ayres), for a northern blennioid fish (family Stichaeidae) 23

ERRATA — (See note on page ii) 62b

SPECIAL NOTE — The figure of Macropinna microstoma on page 58 was printed upside down.
